

Case Files Collection User Guide

About This Guide

The **Case Files Collection** User Guide provides users with a detailed roadmap for using and engaging with the resources in the site. This guide describes Case Files Collection and what content can be attained in the site, as well as details how to create and use an Access profile.

Coupled with the Case Files Collection support page on the Access User Center and the Case Files Collection LibGuide, this user guide will provide users with the needed information for effectively deploying the resources in Case Files Collection for academics and clinical practice.

About Case Files Collection

What is the Case Files Collection?

AccessMedicine's Case Files Collection from McGraw-Hill Education offers the best-selling Case Files content in an interactive format. Updated regularly, this comprehensive case collection helps students learn and apply basic science and clinical medicine concepts in the context of realistic patient cases.

The Case Files Collection can help students at all levels excel in coursework and in clinical rotations; and allow faculty to include clinical cases into their digital curricula.

Why is the Case Files Collection unique?

The Case Files Collection provides premier case content with the goal of improving learning outcomes through exposure to clinical cases. The Case Files Collection features:

- The complete collection of basic science, clinical medicine, and post-graduate level cases from 23 Case Files series books
- An interactive format to help students learn and retain knowledge through exposure to realistic patient cases
- Personalized functionality to let users mark their progress through completed and unseen cases

Access Profile

Users create and use their personal Access Profile to unlock key features:

- Work through challenging patient cases
- Create and take quizzes for self-assessment
- Connect remotely off-site through VPN authentication
- Bookmark favorite content to view later
- Organize important content in collections
- Browse recently viewed content
- Receive alerts about important new content additions
- Download multiple images to PowerPoint with citations and references automatically populated

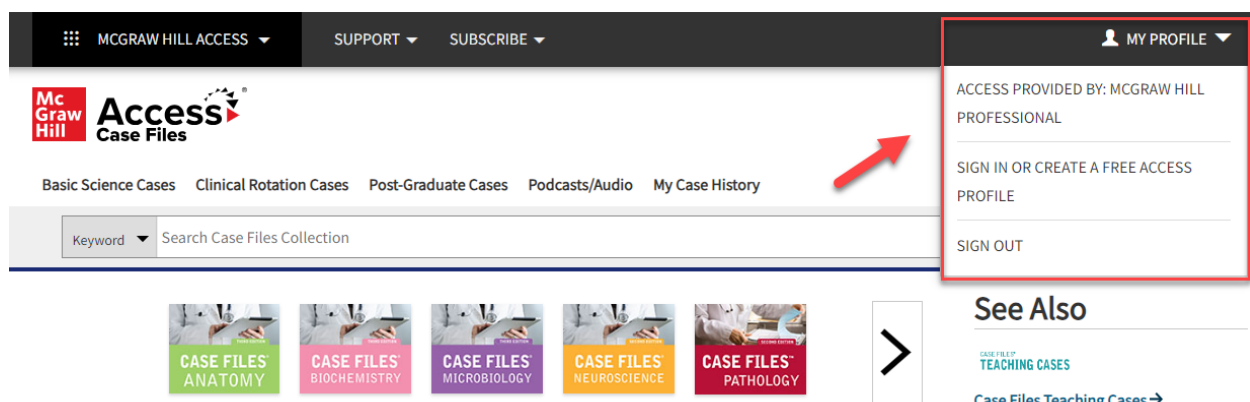

How to Set Up Your Access Profile in 3 Easy Steps

- Go to <https://mhmedical.com/umbrella-index.aspx> or navigate to any product homepage. You must be on-site at your institution or organization when first creating your Access Profile.
- Click on your "My Profile" in the upper right-hand corner of any page. Once there, click on "Sign In or Create a Free Access Profile."
- In the pop-up window, click "Create a Free Access Profile."

[Watch this tutorial](#) on the Access User Center to learn more about the Access Profile.

Helpful Tip

To keep your Access Profile active, you must sign into your profile every 90 days while either on-site or through your institution's or organization's VPN or proxy server.

The screenshot shows the top navigation bar of the McGraw Hill Access Case Files website. The navigation bar includes links for 'MCGRAW HILL ACCESS', 'SUPPORT', and 'SUBSCRIBE'. The 'MY PROFILE' dropdown menu is open, showing options for 'ACCESS PROVIDED BY: MCGRAW HILL PROFESSIONAL', 'SIGN IN OR CREATE A FREE ACCESS PROFILE', and 'SIGN OUT'. A red arrow points to the 'MY PROFILE' dropdown menu. Below the navigation bar, there is a search bar with the text 'Keyword Search Case Files Collection'. Below the search bar, there are five colored buttons for 'CASE FILES' in different subjects: ANATOMY, BIOCHEMISTRY, MICROBIOLOGY, NEUROSCIENCE, and PATHOLOGY. To the right of these buttons is a right-pointing arrow. Below the buttons, there is a 'See Also' section with a link for 'CASE FILES TEACHING CASES' and 'Case Files Teaching Cases'.

Searching

The search feature in **Case Files Collection** is simple and easy to use. You can learn more about the search feature by [watching this tutorial](#) on the **Access User Center**.

Search Box

In **Case Files Collection**, you can search for resources:

- Auto-suggest appears as you type (can be disabled)
- You can "phrase search" using quotations
- Get the same search results by combining terms together or by using **AND**
 - e.g., *heart failure complications= heart failure AND complications*

Search Builder

To the left of your search results, search builder allows you to:

- Focus the search by modifying your terms (keyword, title, author, ISBN)
- Filter results by format (cases, images, multimedia, etc.)
- Narrow results by topics

Federated Search

A federated search expands your results from **Case Files Collection** to include results from other McGraw Hill Access Medical sites:

- Click "Search gastroenteritis across all McGraw Hill Medical sites" to select federated search
- Search builder elements above apply
- Green dot indicates the item is available in your subscription

Case Files

Basic Science Cases

- Cases are available for topics in Anatomy, Biochemistry, Microbiology, Neuroscience, Pathology, Pharmacology, and Physiology.
- Basic science cases are tailored for early-stage medical students.

Clinical Rotation Cases

- Cases are available for topics in Anesthesiology, Cardiology, Critical Care, Emergency Medicine, Family Medicine, Geriatrics, Internal Medicine, Medical Ethics & Professionalism, Neurology, Obstetrics & Gynecology, Pediatrics, Psychiatry, and Surgery.
- Clinical rotation cases are designed to help trainees and residents navigate real-life patient scenarios across various medical fields, providing essential preparation for their rotations.

Post-Graduate Cases

- Cases are available for topics in Anesthesiology, Cardiology, Critical Care, Geriatrics, Gynecologic Surgery, High-Risk Obstetrics, Medical Ethics & Professionalism, and Orthopaedic Surgery.
- Post-graduate cases are advanced scenarios for practitioners, with some overlap with clinical rotation cases but focused on more complex topics.

Helpful Tip

The "Tools" dropdown provides an exportable/downloadable list of cases. The URLs on the left are durable and can be embedded in your Learning Management System (LMS).

The screenshot shows a navigation menu on the left with four categories: All Case Files, Basic Science Cases (highlighted), Clinical Rotation Cases, and Post-Graduate Cases. A 'Tools' dropdown menu is open, pointing to the 'View an exportable list of resources' option. Below this, a grid of case file boxes is displayed, each with a title and author list:

Case Files: Anatomy 3e Eugene C. Toy, Lawrence M. Ross, Han Zhang, Cristo Papasakelariou	Case Files: Biochemistry 3e Eugene C. Toy, William E. Seifert, Jr., Henry W. Strobel, Konrad P. Harms	Case Files: Microbiology 3e Eugene C. Toy, Cynthia R. Skinner Debord, Audrey Wanger, Chris Mackenzie, Anush S. Pillai, James D. Kettering	Case Files: Neuroscience 2e Eugene C. Toy, Evan Yale Snyder, Josh Neman, Rahul Jandial
Case Files: Pathology 2e Eugene C. Toy, Margaret O. Uthman, Uthman Ed, Earl J. Brown	Case Files: Pharmacology 3e Eugene C. Toy, David S. Loose, Shelley A. Tischkau, Anush S. Pillai	Case Files: Physiology 2e Eugene C. Toy, Norman Weisbrodt, William P. Dubinsky, Roger G. O'Neil, Edgar T. Walters, Konrad P. Harms	

Case View

There are three viewing options for cases: by body system or category, by case topic alphabetically, and by an unlabeled number view. The first two options let you see the topic before diving into details, while the third option is unlabeled, allowing you to challenge yourself without knowing the topic upfront.

The "Go to Comprehensive Review Questions" option takes you to a set of randomized MCQs covering various topics related to the collection you're currently in, designed to test your knowledge and comprehension.

The Case Key on the right displays icons for unopened, viewed, and completed cases, which you can track, review, and continue from your Access profile.

Case Details

Every case includes five different tabs: Case, Approach, Science/Clinical Pearls, References, and Comprehension Questions/Case Quiz.

Case

- A detailed presentation of the patient scenario, including history, chief complaint, assessment findings, and diagnostic results.
- Engage with topical questions where you can save your answers or view the correct answers.

The screenshot shows the 'Case' tab interface. At the top, there are navigation tabs: Case, Approach, Clinical Pearls, References, and Case Quiz. Below the tabs is a 'Listen' button. The main content area contains a paragraph of text describing a 78-year-old woman brought to the emergency department with a history of dementia, hypertension, and type 2 diabetes mellitus. Below the text is a 'Questions' section with three questions and corresponding input fields:

- What is the most likely diagnosis?
- What is the most likely etiology for this condition?
- What is the best initial treatment?

 At the bottom of the questions section are two buttons: 'Save Answers' and 'Show Answers'.

Approach

- A comprehensive walkthrough of the case, starting with key definitions and including a detailed discussion on pathophysiology, clinical presentation, diagnosis, treatment, complications, and more.
- This section may feature images and tables that can be saved, downloaded, viewed in full size, and printed.

The screenshot shows the 'Approach' tab interface. At the top, there are navigation tabs: Case, Approach, Clinical Pearls, References, and Case Quiz. Below the tabs is a 'Listen' button. The main content area contains a 'Definitions' section with two definitions:

- SEPSIS:** A life-threatening condition characterized by organ dysfunction due to a dysregulated immune or inflammatory response to infection.
- SEPTIC SHOCK:** Sepsis-induced hypotension (such as a mean arterial pressure [MAP] below 65 mm Hg) and cellular/metabolic abnormalities despite adequate IV fluids.

 Below the definitions is a 'Sepsis' section with a paragraph of text. At the bottom of the 'Sepsis' section is a table caption:

Table 3-2
SEQUENTIAL (SEPSIS-RELATED) ORGAN FAILURE ASSESSMENT SCORE

 The table itself is partially visible below the caption.

Science/Clinical Pearls

- Essential insights and practical tips that offer valuable guidance and enhance understanding of key aspects in the case study.

References

- List of resources linked with open URLs to integrate seamlessly with the user's library collections.

Comprehension Questions/Case Quiz

- These MCQs are designed to test the user's understanding of the case.
- After submitting a quiz, you'll receive your score along with detailed explanations for both correct and incorrect answers.
- Results can be printed or shared via email.

Sepsis >

Quiz Results

Your Score: 33 %

You answered 1 of 3 questions correctly.

Question 1: Correct

3.1 A 32-year-old woman is in the emergency department with suspected sepsis. Despite 3 L of intravenous (IV) normal saline, she is noted to have a mean arterial pressure (MAP) of 55 mm Hg. Which of the following is the best next step?

- A Use a colloid (albumin) for the next bolus.
- ✓ B Initiate norepinephrine infusion.
- C Administer corticosteroid therapy.
- D Transfuse with fresh-frozen plasma.
- E Administer activated protein C.

The correct answer is B. You answered B.

Explanation:
B. Initiate norepinephrine infusion. This patient has a MAP of 55 mm Hg, which is below the desired MAP of at least 65 mm Hg. A vasopressor agent such as norepinephrine (or dopamine) is the treatment of choice for hypotension that is unresponsive to IV saline infusion. The use of colloids (answer A) during resuscitation has not been shown to improve the outcome compared to crystalloids. Corticosteroids (answer C) have not been shown to have a consistent effect on outcomes. Fresh-frozen plasma (answer D) and activated protein C (answer E) are not indicated with hypotension; these agents are given with coagulopathy and bleeding.

84% of users answered correctly.

Podcasts/Audio

Case Files Podcasts offer a conversational and informative series that complements the cases in the Case Files Collection.

- Approximately 100 podcasts narrated by Dr. Eugene Toy, the series editor
- Enhance and clarify the information from the corresponding cases
- Available for Clinical Rotation Cases in Family Medicine, Internal Medicine, Obstetrics & Gynecology, and Surgery
- Features include saving, sharing, bookmarking, and downloading podcasts
